Book : [Basic animal nutrition and feeding.](#) 1974 pp.vi + 300pp.

Abstract : This book is another textbook which covers the whole range of animal nutrition, and as such it cannot be said to be complete for any single reader or his own particular interest or speciality. The authors are well aware of this, and in their preface they say ". . . it is a matter of picking and choosing what to include on any one area or subject must be slighted" to keep the book within reasonable limits of cost and price. With this in mind it may be fairly described as a useful book for animal nutrition readers, and the extensive coverage of applied animal nutrition is perhaps not to be found in some other textbooks. However, as a book which is going to be co

re-read, the plastic ring binding, unfortunately small for the bulk of the page
shortcoming which counteracts the advantage of lower price to some extent
