## [Sampling techniques for forest resource inventory.](#)

Author(s) : [Shiver, B. D.](#) ; [Borders, B. E.](#)

Author Affiliation : Correspondence address: University of Georgia, Athens, GA 30602

Book : [Sampling techniques for forest resource inventory.](#) 1996 pp.xii + 356 pp.

Abstract : The book was written as a textbook that clearly explains the sampling methods associated with forest inventory for the practitioner. Examples are used extensively throughout the book to illustrate various estimators and to demonstrate different sampling methods. Problems (with answers) are also included at the end of each chapter. The 11 chapters are: Introduction; A review of necessary statistics and notation; Elementary sampling methods: selective, simple random and systematic sampling.

Horizontal point sampling; Stratified random sampling; Ratio and regression  
Double sampling or two-phase sampling; Multistage sampling - inventorying  
acreages; Inventory methods for estimating stand growth; 3P and line inter:  
and Estimating wildlife population sizes. There is a subject index.
