Stress Damages the Brain

[Here.](#)

We have actually known this for a long time now, but more and more research is starting to come in these days, in particular with soldiers with PTSD. Prolonged stress also makes it more likely that one will develop Alzheimer's or other forms of dementia in old age.

Keep your stress levels low!

Three Most Important and Influential Writers of the 20th Century (First Half)

I am going to totally go out on a limb here and list three:

1. James Joyce
2. Sigmund Freud
3. Franz Kafka

One might argue that Freud's theory lies in ruins, but it is in his great essays where he truly shines. Civilization and its Discontents and many more.

Joyce, really, the father of modernism. No?

And Kafka. The man who truly opened the door to the absurd for the average man.

Absurdism, alienation, anonymity, bureaucracy, facelessness, atomism, in short, our modern condition itself, was all presaged by the great Kafka.

Anyone else want to have a go.

Rules:

1. List three and only three!
2. Hopefully confine yourself to 1900-1950, but you can go to 1900-2000 if you wish.
3. Try to defend your choices if you can.

Matt Forney (In Mala Fide) on the Manosphere

[Here.](#)

Read it all. My thoughts exactly.

The takeaway line:

The manosphere today is primarily comprised of losers, weirdos and freaks. Cuckold fetishists who orbit Red Pill Women™ begging for stories of them getting fucked by their oh-so-alpha hubbies. Keyboard players who'd rather hate-masturbate to the latest Jezebel article than do something interesting with their lives. 30-year old virgins who lecture other men about "hypergamy" and "solipsism." Plain Jane groupies who flash their panties at men in exchange for little pats on the head. And they'll all gladly support frauds, so long as those frauds tell them what they want to hear.

I am a member of the Manosphere, but I must admit that I hate it. I suppose I am the Left "Men's Liberation" wing, but that has about zero members other than me.

What the Hell is a Red Pill Woman? One with an Alpha fetish? Tell her to give me a call. I do not hate Jezebel. I do not hate feminists. Sure, many to most feminists are idiots, but so are Manosphere types! In fact, there are fewer idiots in the feminist space than in the Manosphere. And Jezebel is one of the more rational feminist hangouts on the web.

Yes, the incels are preposterous, but they are an important part of our movement. Tell some of those panty-flashing groupies to give me a call.

The last comment is a perfect reference to Roissy and all of the other tools out there.

The Greatest Great Books List Ever A-F

Warning: Extremely long, ~800 authors and ~155 pages.

There are great books lists all over the Internet. This is my contribution.

Obviously, there are an incredible number of books out there. How many of them qualify as actual classics in one form or another? Not many, hopefully.

The list attempted to include “classics” only, broadly defined, or anything that could be considered notable, great or fine literature. For nonfiction, I also attempted to include notable, great and fine works.

One attempt to was to list all of the great, excellent and fine literature and literary writing produced in the past 50 years all over the globe. Then we want all of the classics around the globe for the previous 50 years. Before 1900, any superb literary work that is still withstanding the test of time.

Surely this list does not even include 1% of the excellent books written around the globe in the past century. Even before 1900, much fine work is missing simply because time has been cruel to it regardless of its quality. No matter how good it is, if it's not read anymore, it's not going on the list.

This was a very difficult project. All books on the list were at least researched, but of course they were not all read. One method was utilizing the *Amazon* ratings system. I wanted a rating of at least 4 on the 1-5 scale of a work that qualified as a great book or classic. Then I often wanted at least 5 reviews. I also consulted *Wikipedia* a lot.

These strict rules winnowed out a very large number of books, often up to 90-95% of even an excellent author's repertoire.

For modern authors, I wanted any books that were widely reviewed and considered to be excellent, fine quality literature. Any high quality work of modern literary quality that was very widely and well reviewed should make it on. Or I looked to *Wikipedia* to see if the work was praised as excellent. Then I went to *Amazon* and went with my four star average for five or more reviews rule. I also utilized various great books lists around the net.

Going back a little further time, say 50 years or so, I start to want "classics," or books that have withstood the test of a half-decade. Any older book that made it onto any book publisher's "classics" series of any type is virtually assured of making it onto the list. Otherwise I referred to *Wikipedia* for whether the work represented some of the author's finest work. If so, it went on. Then I consulted *Amazon* to see if I could get five or more reviews giving four or more stars.

For some superb authors who I personally love, rules were violated, and their works simply went on the list because I thought they were great.

In general, genre works were not included. However, some genre authors have produced great literature that transcends the narrowness of their genre. These were included.

Last count I have read 418 of the works below either partially or in whole. If it's italicized, that means that I read it.

I favored certain interests, as you might see: Beats, Symbolists, Surrealists, Gonzo, the avant-garde in general, Marxism and the Left, etc. I also much favored fiction and poetry (literature) over non-fiction. For non-fiction, I have a soft spot for literary criticism and history.

Conspicuous efforts were made to determine which of a great older writer's works were still worth reading and which were not. An effort was made not to prejudice the modern era but also to pay homage to the greats of the past. A certain effort was made to go beyond the works of the Anglosphere and even to go beyond Western Europe if I could, but I only got partway there. The literature of Poland, Hungary, Czechoslovakia, Greece,

Italy, Netherlands, Iceland, Sweden, Norway, Denmark, Austria, Germany, Spain, Portugal, France, Latin America, Russia, Ireland, Scotland, Australia, New Zealand, England, the US, Japan, India and China were touched on.

Only books in English translation and still available for readers to purchase or download made it onto the list.

A vast number of books were not included because they lack an English translation.

If humans can no longer access a work, it's worthless. A number of fine books did not make it onto the list due to lack of availability.

This work is not yet finished and may never be.

This may be seen as a parallel to Martin Seymour-Smith's incredible 1,450 page [The Guide to Modern World Literature](#), except he actually read all that stuff, and I didn't. Plus he read in 20 different languages.

If you've got nothing better to do and feel like reading a book, you might want to look through the list and see if there is anything that tickles your fancy. You can hardly go wrong with any book on the list, provided it's to your taste. And there are much worse ways to spend your time than reading a great book.

Or if you don't want to read any of the books, you might want to look them up to see why they are on the list. If you've never heard of an author on the list, you might want to look them up to see why they are on the list too.

Comments or recommendations are encouraged.

by Anders Breivik

by Boston Women's Health Book Collective

Complete garbage. Feminist propaganda par extraordinaire.

The Journey to Vapor Island

by Robert Stark
