A study of the species of *Colletotrichum* causing ripe fruit rots in Queensland.

Author(s) : [SIMMONDS, J. H.](#)

Author Affiliation : Qd Dept Primary Industries.

Journal article : [Queensland Journal of Agricultural and Animal Sciences](#) 1966 Vol. 10, pp.437-459

Abstract : The 7 spp. studied [cf. 43, 2976] include a new var. of *C. gloeosporioides* [Glomerella cingulata] on mango, papaw, apple, etc. designated *C. g.* var. *mitis* sp., *C. acutatum* Simmonds, on papaw, strawberry [cf. 38: 21], and tomato, caused by small conidia (8.3-14.4 X 2.5-4 μ) with pointed ends.

Record Number : 19671100370

Language of text : not specified

Language of summary : not specified

Indexing terms for this abstract:

Organism descriptor(s) : Carica, Carica papaya, Colletotrichum, Fragaria, fungi, Glomerella cingulata, Mangifera indica, Phyllachoraceae, Phyllachorales

Descriptor(s) : conidia, fruit rots, mangoes, pathogens, pawpaws, plant pathogens, strawberries

Identifier(s) : Coelomycetes, Colletotrichum gloeosporioides, fungus, papayas, plant pathogens, fungi, phytopathogens, plant-pathogenic fungi

Geographical Location(s) : Australia, Queensland

Broader term(s) : Caricaceae, Brassicales, eudicots, angiosperms, Spermatophytes, eukaryotes, Carica, Glomerellaceae, Sordariomycetes, Pezizomycotina, Ascomycota, Rosaceae, Rosales, Glomerella, Mangifera, Anacardiaceae, Sapindales, Phyllachorales, countries, Australasia, Oceania, Commonwealth of Nations, Developed Countries, Australia
