Book : [The root of the problem: what's driving tropical deforestation today?](#) 2014  
pp. ref.many

Abstract : This report focuses on the economic agents that play a critical role in driving tropical deforestation in the tropic regions: soybeans, beef cattle, palm oil, timber, and coal for fuel, and small farmers. The role of population and diet, which are key underlying factors in the demand for the tropical commodities causing deforestation, is

This report concluded by describing successes in dealing with these drivers: how the world can achieve development without deforestation.
