This article offers a positive overview of the resurgence of attention to the Holy Spirit in recent evangelical theology. The reinvigorating effects of this development in the life of the church as well as in the work of academic theology from a Pentecostal perspective on the Spirit are treated in terms of their impact on each of the major theological loci. This concise summary draws together the insights of a number of theologians in relation to the author's own widely regarded pneumatology and offers some fresh suggestions on how to build upon the leads and gains that have been made.
