Document Type
Dissertation

Degree Type
Doctor of Philosophy (PhD)

Degree Name
Anthropology (Cultural Heritage Option)

Department or School/College
Department of Anthropology

Committee Chair
Kelly J. Dixon

Committee Members
During the 19th and 20th centuries, emigrants on the Northern American Plains engaged in a communication behavior that left messages carved, incised, and painted onto the physical landscape. Often mingling with indigenous pictographs and petroglyphs known as "rock art," the emigrants' messages are called "historic inscriptions." They exist in the form of names, dates, text, and ideographs. This information is referred to collectively as "residual communication." It represents archaeological evidence of individuals and groups who influenced and transformed environments and histories in the region. The goal of this dissertation is to examine historic inscriptions on the Northern Plains as an unexplored cultural resource that can provide information about topics such as cultural identity, the importance of self, and are literal signatures of colonialism via Northern Plains rock art. While many publications have examined the intricacies of rock art, this dissertation is the first of its kind to systematically examine the data potential of historic inscriptions on the Northern Plains as a cultural resource.
