Abstract

ACKNOWLEDGMENT The material presented in the following pages constitutes

ACKNOWLEDGEMENT The material presented in the following pages constitutes the 58th Annual Report on Medical Education in the United States and Canada, compiled by the Council on Medical Education and Hospitals of the American Medical Association. This report is concerned specifically with basic medical education, certain facets of graduate education beyond medical school, postgraduate medical education, and education-and training in areas allied to medicine which have requested Council cooperation and participation. Detailed information regarding postgraduate medical education is presented annually in a separate issue of The Journal (Aug. 16, 1958). Graduate medical education including internships, residencies, fellowships, and certain pertinent data regarding the specialty boards is revised annually and has been published in the Oct. 4, 1958, issue of The Journal. The data presented cover the academic year 1957-1958 and have been derived from official sources in all instances. The basic questionnaire on which medical schools submitted their annual data
