## Women and the environment.

Author(s) : [Rodda, A.](#)

Book : [Women and the environment.](#) 1991 pp.180pp.

Abstract : The importance of women in relation to environment and development is increasingly focused on. The increasing deterioration of the earth's environment is having an impact on all of its inhabitants. For women worldwide, however, it has a particular significance. The book explains all the major environmental issues. It focuses on women as users, producers and managers of the earth's resources and shows how environmental degradation affects women's health and basic needs. It also reveals how women are a major force for environmental change, particularly through their important roles as educators and communicators. Chapters concern: looking at the environmental process and issues; the role of women; the effects of the environment and

degradation; women as agents of change, an influential force; and case study project implementation. A glossary of environmental terms is included, as well as education and action, a bibliography and resource guide, and a list of relevant organizations.
