Lexical Semantics: The Problem of Polysemy

J. Pustejovsky & Bran Boguraev (eds.)

Oxford University Press (1997)

Authors

James Pustejovsky
Brandeis University

Abstract

Lexical ambiguity presents one of the most intractable problems for language processing studies and, not surprisingly, it is at the core of research in lexical semantics. Originally published as two special issues of the Journal of Semantics, this collection focuses on the problem of polysemy, from the point of view of practitioners of computational linguistics.
