[-] Abstract and Keywords

This article considers some of the conceptual relations and the idea of legal validity. It begins with the discussion of legal validity and presents the idea of inclusive positivism with three versions. The first version maintains that positivists can claim that morality bears on what the law is valid and the other is content validity. This article also briefly discusses the second version maintains that law is basically source based, but not source-based law. This article concludes with the argument that the law was meant to form a middle ground between exclusive and inclusive positivism is invalid.
