Abstract and Keywords

This article considers some of the conceptual relations and the idea of legal validity. It begins with the discussion of the idea of inclusive positivism with three versions. Positivists can claim that morality bears on what the law is, and the other is content validity. This article also briefly considers another version of inclusive positivism, which maintains that law is basically source based, but also incorporates those norms that are entailed by source-based law. This article concludes with the argument that the inclusive version of legal positivism, which was meant to form a middle ground between exclusive legal positivism and Dworkin's anti-positivist doctrine, is invalid.

Keywords: legal validity, legal system, conditional validity, inclusive positivism
