### Abstract

This guide offers advice on best practice regarding the engagement of residents living with dementia and their wellbeing. Our aim is to equip carers, care workers and staff in care homes with ideas and materials for sensory stimulation appropriate for people living with dementia (in particular mid and late stages). We also consider the specific needs and preferences of individuals, their families and care homes.

**Item Type:** Monograph (Manual)

**Additional Information:** This guide is an outcome of the research project The Multi Sensory Environment for Dementia which is funded by the Arts & Humanities Research Council (AHRC). This project's collaborative project partner is Care UK, one of the largest social and health care providers in the UK.
