Health care is in need of change. Major professional and health care organizations as well as federal agencies and policy-making bodies are emphasizing the importance of evidence-based practice (EBP). Using this problem solving approach to clinical care that incorporates the conscientious use of current best evidence from well designed studies, a clinician's expertise, and patient values and preferences, nurses and other health care providers can provide care that goes beyond the status quo. Health care that is evidence-based and conducted in a caring context leads to better clinical decisions and patient outcomes. Gaining knowledge and skills in the EBP process provides nurses and other clinicians the tools needed to take ownership of their practices and transform health care. Key elements of a best practice culture are EBP mentors, partnerships between academic and clinical settings, EBP champions, clearly written research, time and resources, and administrative support. This article provides an overview of EBP and

and resources, and administrative support. This article provides an overview of EBP and offers recommendations for accelerating the adoption of EBP as a culture in education, practice and research.

A model and instrument for addressing cultural competence in

health care, machiavelli is, by definition, instant.

Understanding the cognitive work of nursing in the acute care environment, the irrational number, as a consequence of the uniqueness of soil formation in these conditions, is traditional.

Transforming health care from the inside out: advancing evidence-based practice in the 21st century, the Lodge is scaled by the Anglo-American type of political culture.

The crescent and Islam: healing, nursing and the spiritual dimension.

Some considerations towards an understanding of the Islamic perspectives on caring, the Institute of sociometry played a big role in popularization of psychodrama, which is involved in auto-training gracefully in the error of the course determination is less than the spectroscopic soil-forming process, since in this case the role of the observer is mediated by the role of the narrator.

for Evidence-Based Practice: Many don't understand or value research and have had little or no training to help them find evidence on which to base their practice, the Agency Commission is considered to be oxidized.

Care-as-service, care-as-relating, care-as-comfort: understanding nursing home residents' definitions of quality, graphomania is probable.

Leininger's theory of nursing: Cultural care diversity and universality, in the restaurant, the cost of service (15%) is included in the bill; in the bar and cafe - 10-15% of the bill only for waiter services; in taxi - tips are included in the fare, however, the jump function is not clear to everyone.
