 **Manual of equine practice.**

Author(s) : [Rose, R. J.](#) ; [Hodgson, D. R.](#)

Author Affiliation : Department of Veterinary Clinical Sciences, University of Sydney, Australia.

Book : [Manual of equine practice.](#) 1993 pp.xii + 532 pp. ref.some

Abstract : This book has contributions from Dr Daria Love and Dr John Kohr the two authors and is an expanded and updated version of a book called *Manual of equine practice* written by R. J. Rose in 1983. It is aimed at students and equine-mixed practice veterinarians to provide practical information in a form that is easily available to take on travel with the veterinarian for quick reference, rather than for specialised text used by horse practitioners for less common conditions. The book is organised into systems and within these systems follows a similar format which emphasizes

diagnosis. Each body system is subdivided into important clinical areas and conditions are listed alphabetically within these areas. Any drug recommendation is referred back to a section at the end which provides details of the forms available, the trade names and the dose rates.
