Great Books List Divided into Two Parts

A-M and N-Z.

I know it sounds like I threw everything but the kitchen sink in there, but it was actually very, very hard for an author to get on that list. As you go back in time, it only gets harder. I know a few folks who are authors and I would love to put them on the list, but there’s no way they can get on there right now.

For modern authors, you pretty much need to acknowledged as notable, or big in your academic field. If you are outside of academe, you pretty much need to win an award. If not, you need a Wikipedia page or some other notable authority acknowledging that you are a great modern author. You would not believe how many fine authors I was unable to put on the list and how many fine books that I could not put on there either due to listing criteria.

The Amazon rating criteria is as follows: In general, you need a rating of 4.0+ with 5 or more reviews, although there were some exceptions to that. You have no idea how hard it is for a typical book to achieve that. Amazon reviewers are stingy.

I also added ratings from an out of this world book site called Goodreads. This is a new website solely for books and readers and for some reason, it is not a complete piece of shit like most such sites are. It actually looks good and functions well. I don’t get it. How come it doesn’t blow? Same criteria here: 5 or more raters with average 4.0+ rating. This is even harder to achieve that with Amazon’s system. This system has the disadvantage of privileging books with only a few reviewers or books that have generous reviewers. Poetry reviewers are very generous, so poetry was privileged. When a book has only 5-10 reviews, it’s a lot easier to get 4.0+ ratings than when a book has 500-1,500 raters.

One thing very nice about Goodreads is that it has many more reviewers than Amazon does. Another nice thing is that Goodreads has actually spent much more quality time on its site than Amazon has. One serious throwback is that authors with the same name get one listing. “John Smith” might list 10 different authors. Lame.
Amazon simply spends no money whatsoever on its site, which is why it blows. Authors may be listed in several different ways. For instance, you click on an author “John Smith” and you get 5 different lists of the same authors stuff. Stupid. And the same author, listed “John K. Smith” has 2 separate entries that are completely different from John Smith. Reason for the tidal wave of crap on Amazon. Amazon doesn’t care! They don’t care about quality, they don’t care if their listings make sense or not, they don’t care, don’t care, don’t care.

Amazon refuses to fix its site because that would cost money, and Amazon is all about having the cheapest books in town. Amazon is a perfect example of the shitholization of American capitalism where attempts to sell at the lowest possible price to reduce costs to their lowest levels insures absolute shit products and utterly horrific customer service. But hey! For those cheap prices, we will bend over again and again.

Obviously, you are never going to read all of those books, but looking through there, you can at least learn who the great authors are and what their finest works are. If you haven’t heard of someone, you can just Google or better yet Wikipedia them. Most authors on the list have a Wikipedia entry. It was not mandatory for getting on the list, but it sure helped. It’s nice to say you have heard of great books and their great authors. Then you can name drop and appear “edumacated.” You probably won’t impress anyone, but at least you can give your ego a woody or a wettie.

Novelists are the greatest psychologists of them all

Here.

Well, of course they are. Read Sartre, Tolstoy and especially Dostoevsky, the greatest of them all. I am actually partial to the Russians myself. Nabokov did a great job of following in their footsteps. *Lolita* is a psychological masterpiece.

Are Spanish and Portuguese One Language?

Janie writes:

And Robert, your comment about "There should be a link to the Spanish-Portuguese study. The rest is just native speakers guessing", sounds like a weak and unfair attempt on your part to discredit the opinions of others. Just because you have an MA in Linguistics doesn’t make you an infallible expert on language matters. If anything, a person with a PhD in Linguistics would certainly seem more credible to me.

As a previous writer correctly pointed out, sometimes the ‘real’ labs are, as he put it, ‘the streets’. Much of my graduate sociology graduate research was conducted ‘on-the-streets’. When you mingle with the speakers of languages, in this case Portuguese and Spanish, you gain a very different perspective, certainly different than what your academic labs statistics show. For the record, I am a native Spanish speaker from Spain. In Europe, Portuguese and Spaniards have no trouble at all communicating with one another – we consider ourselves brothers, historically, culturally and linguistically. This is fact.

Additionally, I actually studied in New Jersey where there are tons of Spanish and Portuguese speakers. I have many friends who speak these two languages, and I have heard them conversing rather effortlessly with one another all my life. What are you going to tell me, that I’m imagining things? Please. You might be tempted not to post this, but please do the right thing and do post it. Judging from some of the earlier posts, I can assure you that there will be many future responders who will agree with many of the things I have said.

Yes, and many Spanish speakers around me told me flat out that “they can’t understand Portuguese.” On the Net, when I write in Spanish to my Brazilian friends who speak
Portuguese, *they can’t really understand me.* I asked them if they speak Spanish, and they said, “Not really.” And in the article the commenter commented on, there are many reports of Spanish and Portuguese speakers not understanding each other very well.

That’s right, I do not believe that it is the typical experience of Spanish and Portuguese speakers in Europe to communicate effortlessly.

I understand that Spanish speakers can’t even understand Fala, and that’s Galician (Portuguese with heavy Spanish influence) with heavy Castilian influence on top of that. Spanish speakers say they “can’t understand a word” of Fala.

On a recent program on Galician TV, a variety of odd forms of Galician or Portuguese spoken in Spain were highlighted. All of these odd forms received subtitles on Galician TV. Brazilian Portuguese speakers told me that they often have a hard time understanding and especially reading European Portuguese. Speakers of the Portuguese dialect closest to Galician report that attempts to speak with Galician speakers on the border with Spain are so difficult that both parties resort to Castillian to be understood. And Ethnologue says that is one language. Portuguese speakers report that they can’t understand Barranquenho, an archaic form of Portuguese full of Castillian spoken on the border with Spain.

My understanding is that even on the border of Spain and Portugal, border villages can’t exactly communicate with each other.

Spaniards can’t even understand other forms of so-called Castillian which are said to be one language.

Spaniards cannot understand either Asturian or hard Extremaduran. In fact, Extremaduran speakers can’t understand Asturian, and some say that that is one language. The Castillian spoken by old Galician women is so odd and full of Galician that most Spaniards cannot understand it. Spaniards can’t even understand Aragonese very well. In fact, on opposite ends of Aragonese, Aragonese speakers can’t even understand each other. Spaniards, especially from the north around the Basque country, can’t understand a word of hard Andalucian. Some Manchengo speakers even say that they are not understand by speakers of Standard Castillian.

Asturian speakers can’t understand Galician, and both are almost Portuguese. Younger speakers of West Asturian Eonavian can’t even understand Galician, and Eonavian is the closest Asturian to Galician.

If Spaniards can’t even understand other forms of so-called Castillian, how the Hell can
they understand Portuguese?

When people speaking different languages talk to each other, they can often negotiate a certain meaning by speaking more slowly, adjusting their speech, etc. That doesn’t mean that they are speaking the same language. I meet Italian speakers around here, tourists who are confounded by English. I speak Spanish to them, and we negotiate some sort of a meaning where they can figure out what to order or whatever. So Spanish and Italians are the same language? No.

The intelligibility test for Spanish and Portuguese was very good. The results came back 54% intelligibility. The truth is that with 54% intelligibility in a face to face encounter, you may be able to negotiate some sort of a meaning via the mechanisms I described above. Intelligibility studies produce proper and correct results.

If what you say is true, that Spanish and Portuguese speakers communicate “effortlessly” everywhere they go, then guess what? Spanish and Portuguese are the same language! You believe that?
