Abstract

This article presents a propulsion model of creative leadership. First, it introduces some general issues in the nature of creative leadership. Then, it presents the propulsion model. Creative leadership can be of three general kinds—leadership that accepts existing ways of doing things, leadership that challenges existing ways of doing things, and leadership that synthesizes different existing ways of doing things. Within these three general kinds of leadership are eight specific types. Finally, the article draws some conclusions and notes other ways of dividing up types of creative leadership.
