## Dead planet, living planet: biodiversity and ecosystem restoration for sustainable development.

Author(s) : [Nellemann, C.](#) ; [Corcoran, E.](#)

Editors : [Nellemann, C.](#); [Corcoran, E.](#)

Book : [Dead planet, living planet: biodiversity and ecosystem restoration for sustainable development](#) 2010 pp.112 pp. ref.many

Abstract : This report is a contribution to the UN's International Year of Biodiversity, a complement to the UNEP-hosted Economics of Ecosystems and Biodiversity, bringing visibility to the wealth of the world's natural capital. It documents on

successful case studies referencing thousands of restoration projects ranging from deserts and rainforests to rivers and coasts. The report confirms that restoration is not only possible but can prove highly profitable in terms of public savings; returning ecosystems to broad objectives of overcoming poverty and achieving sustainability. It also includes important recommendations on how to avoid pitfalls and how to minimize risks to ensure successful restoration.
