Abstract

The previous chapter discussed the concept of culture and the different ways it can be affected by war, politics, travel and scientific change. This chapter is concerned with the growth of global culture and its impact on fashion. It offers a case study of the emergence of Japanese culture from a period of isolation to the development of cultural exchange between the West and Japan. Future trends in an era of mass-produced, low-cost fashion and the implications for sustainability are discussed together with the growth in ethical fashion.
