Abstract

English

Cultural Entropy on Digitizing Balinese Lontar Manuscripts: Overcoming Challenges and Seizing Opportunities.

The lontar manuscript as a documentation medium is highly vulnerable. On the other hand, the development of digital technology provides benefits for digitalization. Digitalization of manuscripts can preserve information and prevent loss. However, much later emerged obstacles and other challenges in the process of digitalization. Technical matters such as the availability of supporting tools are a problem. One of the main problems is that people can not use the digital manuscript because of the script used in the palm leaf manuscript. Decreasing the knowledge of the script can be caused by the process of modernization. The influence of globalization on Balinese peoples led to the cultural entropy on the effort to preserve the manuscript. The preservation activities is that the information contained in the manuscript will not happen if the manuscript has been preserved in digital form, while preservation activities are not only dealing about preserving the information but also the usefulness of the manuscript is also important to note. The conservation of the manuscript done by the library, but involves the community as the owners, together trying to re-popularized the lontar writing tradition, build an understanding of the Balinese lontar manuscript. This was done through the lontar festival, writing class regularly, unique and interesting lontar exhibition, etc. The goal of the manuscript, either physical or digital form. So that the manuscript did not disappear in the future, the manuscript preservation program can be a program that
