Abstract

“El Camino Real: Commercial Trade Route to Santa Fe”

The Royal Road of the Interior Land served as the sole trade artery for the frontier regions of New Spain for the better part of three centuries.

century mission colony of Santa Fe was the northern terminus of the Santa Fe Trail. Caravan trade parties that traveled the near 1,600-mile route were buying and selling goods in Santa Fe. Native laborers were the sustaining colony and manufactured numerous trade exports. Native American contributions and merchant trade on El Camino Real were vital for Santa Fe's ultimate survival as a permanent settlement. In the late eighteenth century, information on supplies needed to be sent overland for mission and military purposes. Colonial era textiles provide an insightful example of commodity exchange between artisans for trade and purchase of needed imports. Sources from the late eighteenth century provide some balance in contextualizing trade systems.
