Book: Managing human resources in the European tourism and hospitality industry. 1995 pp.xii + 281 pp. ref.10 pp. of

Abstract: One of the fastest growing economic sectors, the tourism and hospitality industry worldwide employs over 10 million people. People are clearly a central resource to the industry's effective operation. With a focus on Europe, the book explores the management of human resources in the context of the tourism and hospitality industry.
strategic issues in human resource management facing the tourism and hospitality industry from a multicultural and international perspective. It offers a comprehensive, integrated approach to the subject area, with a review of each issue and discussion questions in each chapter. It focuses on service and quality management as linking human resource management to other management areas, providing interconnections with marketing, finance and product development. Other areas include education and training, planning, the structure and nature of the employment market in Europe, remuneration and sustainability issues. Key theoretical concepts are interpreted through practical application exercises and case study material.
