Metal toxicity in mammals. Volume 2. Chemical toxicity of metals and metalloids.

Author(s) : [Venugopal, B.](#) ; [Luckey, T. D.](#)

Author Affiliation : Dep. Biochemistry, Univ. Missouri, Columbia, Mo., USA.

Book : [Metal toxicity in mammals. Volume 2. Chemical toxicity of metals and metalloids](#). pp.x + 409pp. ref.About 1000

Abstract : For Volume 1 dealing with the physiological and chemical basis for metal toxicity, see NAR/A 48, 3936. This volume offers a systematic, comprehensive review of the toxicological information available to the authors on toxic metals and metalloids. The toxic

inorganic salts and the chemical toxicity and metabolism of radioactive metals are discussed. The chemical toxicity of each nonradioactive metal is discussed in terms of geographical occurrence, uses, chemistry and nutrient status in mammals; its toxicity. There are chapters on the comparative toxicity of metals among species, routes of administration, and groups and periods in the atomic table. There is a useful glossary of terms (pp. 341-352) and an extensive bibliography (pp. 353-402). The short introduction does little to supplement the list of contents. R.E. Hankin.

ISBN : [0306371774](#)

Record Number : 19781476480

Publisher : [Plenum Press](#).

Language of summary : [English](#)

Indexing terms for this abstract:

Organism descriptor(s) : mammals

Descriptor(s) : metals, toxicity

Identifier(s) : book on metal toxicity in mammals

Broader term(s) : vertebrates, Chordata, animals, eukaryotes
