**Abstract:**

Learning to Teach in South Africa is a collection of essays by one of South Africa's most respected teachers. The essays span the crucial years of democratic transition in South Africa and display the unity of the author's thought as he reflects on the idea of epistemological access, a prominent theme in his work. He explores the nature of teaching in any system of education, and the continuing struggle with relativism, one of the strands in his thinking which has helped sculpt the landscape of educational debates over three decades. Written in an accessible style, Learning to Teach in South Africa is an intellectually flavoursome, essential read for those currently involved in shaping South African education, and, perhaps more importantly, for those who will shape it in the future.
