Abstract:

ABSTRACT Pipe Organ Recital By Hae-Yul Grace Chung Master of Music, Performance The contributors Johann Sebastian Bach, Louis Vierne, and Dan Locklair hold a very distinct landmark in the development of organ music. Bach creatively brought Baroque music to its culmination, and is known for his expert craftsmanship that has proven itself through the ages. In the French Romantic period the zenith of organ music was achieved by Vierne through his six organ symphonies. Vierne modified sonata form with a subtle nuance in harmony, and utilized orchestral timbres made possible by the innovative organ of Cavaillé-Coll in the 19th century. Lastly, Locklair, from the perspective of the 21st century, assembles the strengths of the former generations' compositions into a new style that was uniquely his own. He presents his musical ideas in a diversified manner by minimal use of musical materials. This paper examines such notable landmarks and enchanting esthetics by probing the composers' influences, characterizing them, and analyzing their representative works.
