Mathematical programming for natural resource management.

Author(s) : [Dykstra, D. P.](#)

Author Affiliation : Int. Inst. for Appl. Systems Analysis, Laxenburg, Austria.

Book : [Mathematical programming for natural resource management](#). 1984 pp.: ref.many

Abstract : A book aimed at a broad spectrum of readers, including graduate and undergraduate students. There are 10 chapters: Introduction; A graphical introduction to linear programming; The mathematical model of linear programming; Linear programming: numerical methods; Additional numerical concepts and computer solutions in linear programming.

programming; Linear programming applications in natural resource management (timber harvest, veneer production, agroforestry, wildlife management, land loss); Network models; Multiobjective programming [including goal programming]; and Dynamic programming. An index is included.

ISBN : [0070185522](#)

Record Number : 19840693575

Publisher : [McGraw-Hill Book Company](#)

Location of publication : [New York](#)

Country of publication : [USA](#)

Language of text : [English](#)

Language of summary : [English](#)

Indexing terms for this abstract:

Descriptor(s) : agroforestry, computer techniques, Erosion, Forest management, use, management, planning, simulation, Wildlife

Identifier(s) : agriforestry, agro-forestry, computer applications
