 **Plant Anatomy.**Author(s) : [ESAU, K.](#)Book : [Plant anatomy](#) 1965 No.2nd Edition pp.xx + 767 pp. ref.bibls

Abstract : Much water has flowed under scientific bridges since the first edition of Professor Esau's book appeared in 1953 [see *H.A.*, 23: 3632]. All the excellent illustrations of the former edition have been retained, and the results of recent ultrastructural research have been incorporated, both in the text and in the illustrations, especially in the chapters on the protoplast, the cell wall and meristems. The increasing interest among plant anatomists in the relation of meristematic structure to function is amply reflected here. Chapters on secretory structures, formerly concerned only with laticifers, has been considerably expanded to include secretory structures, external as well as internal, and the number of plates in the book is increased from 86 to 95. The expansion of the list of contents to

sub.headings of chapters is a useful innovation. The price may appear high is of outstanding excellence. K.C.

Record Number : 19650307020

Publisher : John Wiley & Sons, Inc., New York, London, Sydney

Language of text : English

Language of summary : English

Indexing terms for this abstract:

Descriptor(s) : bridges, cell walls, meristems, plant anatomy, protoplasts, structu

Identifier(s) : laticifers

Geographical Location(s) : Australia

Broader term(s) : APEC countries, Australasia, Oceania, Commonwealth of Nation

Countries, OECD Countries
