### Abstract

This fourth edition of the leading authority on international sale of goods law provides clear, comprehensive analysis of the subject. The unique dual coverage of contracts under English law and the CISG is a valuable feature. The book is of interest to all types of sale of goods contracts, including the sale of commodities. The detailed commentary covers decided cases as well as on standard form contracts which represent evolving trade practice. In addition to contract law, the book considers relevant property law, most notably addressing those issues arising out of title, such as marine bills of lading. The rights and duties of buyer and seller are explained in depth, and the relationship between sale contracts to other contracts, such as charter parties and letter of credit contracts, is rigorously examined. The book also covers issues of frustration and force majeure, the passing of property and risk, and remedies. The new edition provides comprehensive coverage of remedies, the passing of property, and the CISG, and gives even greater focus to the standard form contracts. Important recent decisions are considered and particularly those relating to interpretation and implied terms. As ever, the law is explained in the context of commercial practice making the book an ideal reference for practitioners, scholars and postgraduate students.
