Book : [The baobab and the mango tree: lessons about development, African and Asian contrasts](#) 2000 pp.xii + 212 pp.

Abstract : The two contrasting development paths followed by Ghana and Asia are compared and contrasted. Following an introduction, chapter 2 considers five ways in which the historical trajectories of Africa and Asia have affected the

situations: cultural capital; geography; ethnic patterns; the impact of colonialism. Chapter 3 analyses the importance of leadership to development; chapter 4 the importance of good foreign policy with regard to the choice and use of allies. Chapter 5 outlines three steps in development planning: fulfil basic needs; restructure essential structures; and focus on the freedom of the populations. Economic development in Africa and Asia is then contrasted in chapter 6 looking at environmental degradation, the role of women in society; and income inequality. The significance of corruption is assessed in chapter 7. Chapter 8 considers the relationship between economic and political development focusing on the debate over Asian values and the role of civil society. Finally, the need for a 'second chance' with regard to development is reviewed in chapters 9 and 10.
