# Pacific Island photography and knowledge in the public domain; a century of contradictory visual histories

Quanchi, Max (2002) Pacific Island photography and knowledge in the public domain; a century of contradictory visual histories. *Spectator: journal of film and television criticism*, 23(1), pp. 13-26.

PDF (12MB)

## Abstract

The extent to which photographs of Oceania facilitated learning-by-looking and educated the reading public is an important historical characteristic of the early 20th century boom in photographically illustrated media - postcards, stereographs, gift albums, illustrated magazines, journals, weekend newspapers and serial encyclopaedia. A century later these same black and white images circulate in the public domain as posters, video covers, museum installations and book illustrations educating a 21st century audience about an imagined (historical) and actual (contemporary) Oceania.
