 [Nutrition of the chicken.](#)

Author(s) : [SCOTT, M. L.](#) ; [NESHEIM, M. C.](#) ; [YOUNG, R. J.](#)

Book : [Nutrition of the chicken.](#) 1969 pp.511 pp.

Abstract : "This book", say the authors, "has been written to serve as a text for undergraduates, a ready reference and text for graduate students, and a source of information for the research worker and the practicing nutritionist." The first two categories may be rather better served than the third, but the research worker will use such a book mainly as "background" and to that extent he too may be served. It is a selected bibliography for each chapter, the chapters dealing with the protein requirements, constituents, vitamins, minerals, non-nutritive feed additives, interrelations of nutrients, requirements, feed-stuffs for poultry and feed formulation, and finally with the nutritive quality. The chapters on feedstuffs and feed formulation are based on

American materials and methods and some tables are in terms of the hybrid pound. Amino acids are expressed as percentages of air-dry feed, not in re nitrogen. There is a section on the use of computers in feed formulation.-D

Record Number : 19701404364

Publisher : M. L. Scott and Associates, Ithaca, N.Y.

Language of text : not specified

Language of summary : not specified

Indexing terms for this abstract:

Organism descriptor(s) : birds, fowls, man

Descriptor(s) : additives, amino acids, bibliographies, computers, crosses, feed a formulation, feeds, hybrids, minerals, nutritionists, poultry, students, vitamins, wc

Identifier(s) : adjuncts, chickens, domesticated birds, feeding stuffs

Broader term(s) : Gallus gallus, Gallus, Phasianidae, Galliformes, birds, vertebrate animals, eukaryotes, Homo, Hominidae, primates, mammals
