### Ethological dictionary. German-English-French.

Author(s) : [Heymer, A.](#)

Book : [Ethological dictionary. German-English-French.](#) 1978 pp.238pp. ref.586

Abstract : This is the first ethological (ethology = biology of behaviour) dictionary contains about 1000 selected key terms listed in alphabetical order in German index on pp.223-229 and a French index on pp.230-237 gives the reader access to corresponding English and French terms. Each term is followed by a short definition and examples are included where necessary. The author chose to list the German terms in alphabetical order mainly because many of the terms originated in German. It was also easier for him to compile the material in his own language. As we

relating to animal behaviour, there are also a large number stemming from behaviour. The author stresses that this dictionary is an attempt to explain ethological terms in three languages, but must not be taken as a final definition of terms, more as a tri-lingual basis for further discussion. Illustrations (line drawings and black and white photographs) have been included where necessary for further understanding of the text.
