Predicting rainfall erosion losses - a guide to conservation planning.

Author(s) : [Wischmeier, W. H.](#) ; [Smith, D. D.](#)

Author Affiliation : Science and Education Administration, USDA, Hyattsville, Maryland

Book : [Predicting rainfall erosion losses - a guide to conservation planning](#) 1978 ref.67

Abstract : Scientific planning for soil and water conservation requires knowledge of the relations between those factors that cause loss of soil and water and those that reduce such losses. The soil loss prediction procedure presented in this handbook provides specific guidelines which are needed for selecting the control practices.

suitable to the particular needs of each site. The procedure is founded on an loss equation that is believed to be applicable wherever numerical values of available. KEYWORDS: TROPAG | Miscellaneous subjects | Climatology | Land Conservation and Management | USA (Mainland).

Record Number : 19786726437

Publisher : USDA, Science and Education Administration

Location of publication : Hyattsville, Maryland

Country of publication : USA

Language of text : English

Language of summary : English

Indexing terms for this abstract:

Descriptor(s) : climate, conservation, erosion, guidelines, handbooks, losses, methods, nature conservation, planning, rain, soil, soil conservation, water conservation

Identifier(s) : manuals, rainfall, recommendations, United States of America

Geographical Location(s) : USA

Broader term(s) : APEC countries, Developed Countries, North America, America,
