Sampling Microbiological Aerosols.

Author(s) : [WOLF, H. W.](#) ; [SKALIY, P.](#) ; [HALL, L. B.](#) ; [HARRIS, M. M.](#) ; [DECKER, H. M.](#) ; [M.](#) ; [DAHL-GREN, C. M.](#)

Book : [Public Health Service Publications](#) 1959 No.686 pp.v + 53 pp. ref.82

Abstract : The greater part of this useful monograph is given to brief descriptions and illustrations and summarized technical data, of nearly 40 different bacteriological samplers. In addition there is a general description of the principles followed in the design of bacteriological air samplers and of their respective advantages and disadvantages. Particle sizing samplers are mentioned [but the monograph was prepared before the publication of LIDWELL'S description of his elegant 4-stage particle sizing slit sampler (*Bulletin*, 1959, v. 34, 921)]. There is a brief section on operational methods. The various samplers have been noted in this *Bulletin* at the time of their description. *R.*
