The design and application of an EXCEL book for automatic processing meteorological data in environmental quality assessment

JIN Yu(The Bureau of Environmental Protection,Xuanwu District,Beijing 100053)

For the important effect of meteorological factors in pollutant diffusion process,the environmental quality assessment with mass meteorological data.The use of computer in processing data liberated people from computing,but ready-to-use software is too expensive or maybe lack of agility in special use.This paper will introduce a novel method of meteorological data processing,use the widely used software,EXCEL,which is a part of MS OFFICE software,the newly constructed EXCEL book can process data fast and exactly,which is a practical method in environmental quality assessment.
