reservations, and relocated to live with white Mormon families in public schools and were expected to conform to white culture. It is clear that the program was a missionary tool used to assimilate children into the society, often at a great cultural, familial, and psychological cost.

Although historians and scholars are writing more about Native American experiences as of late, little has been recorded about this particular study pulls together what has been recorded about the program from various perspectives and information provided by past participants via interviews.

There are both negative and positive outcomes suggested by participants and researchers. Perhaps the most important contributions that have been made concern the Native Americans themselves and their responses to the program, resistance, and, ultimately, resilience in the face of acculturation.
