[Tourism in polar regions: from dream to reality.](#)

Foreign Title : Le tourisme dans les régions polaires: du rêve à la réalité.

Author(s) : [Girard, L.](#)

Journal article : [Espaces \(Paris\)](#) 1995 No.132 pp.39-44

Abstract : The Arctic and Antarctic regions, although similar in terms of climate, have numerous differences, the two most important being their population and sovereignty. These differences have led to divergent trends in tourism development. This article explores developments in tourism in the two regions, looking in particular at environmental impacts, and discusses the importance of a strict environmental policy and of effective tourism management as keys to sustainable development.
