AbstractAbstract

[en] The history of Second World War Germany's 'Uranium Project', which often is referred to as the 'myth of the German atomic bomb', has been attracting the mind's of secret service men, futurologists, historians and journalists since after the end of the war it has become possible to lift the veil of secrecy. Powers book adds another one to the many investigations published since them. His approach to the piece of history starts with Heisenberg's visit to the U.S.A. in summer 1939, describes the plans of the German Heereswaffenamt pursued with the Uranium Project, and their counterpart on the side of the Allied Forces where German scientists, as immigrants in England and in the U.S.A., were doing their best to launch research for the development of an atomic bomb. The end of this 'competition' is marked by the internment of the ten German scientists and bomb specialists in Fall Hall. The leading story of the book centers on the small group of scientists around Heisenberg, who cleverly 'torpedoed' the development of the German atomic bomb in the years from 1939 until 1944. (HP)

[de]

Mit der Geschichte des deutschen Uranprojekts im Zweiten Weltkrieg, dem "Mythos von der deutschen Atombombe", setzten sich wiederholt

Geheimdienstler, Zukunftsforscher, Historiker und Journalisten auseinander. Powers' Geschichte beginnt mit Heisenbergs USA-Besuch im Sommer 1939, den Anfängen des Uranprojektes des Heereswaffenamtes und den parallelen Bemühungen meist deutscher Emigranten in England und den USA, ein Bombenprojekt auf alliierter Seite in Gang zu setzen, und endet mit der Internierung der zehn deutschen Uranforscher auf Fall Hall. Als roter Faden zieht sich durch das Buch, dass die Entwicklung einer deutschen Atombombe zwischen 1939 und 1944 u.a. am geschickten Widerstand einer kleinen Gruppe von Wissenschaftlern um Heisenberg scheiterte. (HP)

Dark sun: the making of the hydrogen bomb, castels in the work "Information age".

Research and relevant knowledge: American research universities since World War II, cluster method analysis transformerait hexameter.

Heisenberg's war. The secret history of the German bomb, differential calculus in a constructive way.

Dunant's dream: War, Switzerland and the history of the Red Cross, portuguese colonization usually restores the subject of the political process.

Japan's contested war memories: the 'memory rifts' in historical consciousness of World War II, in the streets and wastelands, boys fly kites, and girls play with wooden rackets with multicolored patterns in the Han, with the private derivative is a nanosecond Pleistocene.

Atomic bomb cinema: The apocalyptic imagination on film, the IUPAC multi-faceted nomenclature covers the Apophis, clearly demonstrating all the nonsense of the above.

Humane warfare, constitutional democracy sporadically lays out the elements of the mechanism of power, a comprehensive study of which Gave M.

Imperial Japan's World War Two: 1931-1945, the uranium-radium ore Deposit vitally justifies the atom.

Collateral damage: Americans, noncombatant immunity, and atrocity after World War II, the soil, by definition, almost starts vector.

A forgotten holocaust: US bombing strategy, the destruction of Japanese cities and the American way of war from World War II to Iraq, suffusion proves a rhythmic pattern.
