The financial cost of fraud: what data from around the world shows

Research output: Book/Report > Commissioned report

Jim Gee

[Professor Mark Button](#)

Graham Brooks

[Institute of Criminal Justice Studies](#)

The report doesn't just look at detected fraud or the individual cases which have come to light and been prosecuted. Because there is no crime which has a 100% detection rate, adding together detected fraud significantly underestimates the extent of the problem. It is also the case that if detected fraud losses go up, does that mean that there is more fraud or that there has been better detection; equally, if detected fraud losses fall, does that mean that there is less fraud or worse detection?
