### **Abstract**

*"Photography gave the world a lifelike memory. It is especially but serves other areas exceptionally well also. Legions of phot medium with great energy; many also have used it with great integrity. The heirs of earlier photojournalists continue in the advantage of the significant improvements in technology to b readers and with heightened ethical awareness."* Fred Parrist

This study examined the decision and thought process pl handling manipulated images through digital photograph the practice of editing has not changed, but the way in wh photographs has changed. Computer screens replaced l computer software replaced photographic loupes.

This study examined the code of ethics from various publ and foreign locations, finding out if a code of ethics for ne updated to incorporate digital technology. Fifty percent o had a written code of ethics specifically dealing with digita Domestic newspapers exceeded the foreign newspapers issue of digital photography usage.

The research indicated digital technology allows altered i and published without the photo editor detecting any ma of the publication may be lost if readers stop believing w

Digital technology has created a paradigm shift in photog photographing images remains the same, but digital phc changed the medium in which images are produced. The technology was the main factor in a paradigm shift. The a technology helped speed the process in getting photogr publications. Through printed versions or internet public photograph has allowed for more images reproduced.
