Vegetables in the tropics.

Author(s) : [Tindall, H. D.](#)

Book : [Vegetables in the tropics.](#) 1983 pp.533 pp. ref.many

Abstract : Vegetables in the tropics are numerous and diverse. They include better known elsewhere as ornamentals (e.g. *Celosia argentea*) or weeds (*nigrum*) and plants of non-tropical origin which rarely set seed in the tropics (cabbage). This very comprehensive book covers some 140 vegetable crops (23 families) described in alphabetical order of family, genus and species. Information provided on: common names; botanical varieties; cultivars selected for specific centre of origin and distribution; areas of cultivation; botanical description; environmental response; cultural requirements; growth period and harvesting; preparation and storage; use and nutritional composition; and pests and diseases. Most

illustrated by clear line drawings or monochrome photographs. Each chapter by a bibliography. Some standard books on tropical agriculture are extensive attempt has been made to include the numerous non-herbaceous tropical which are used as vegetables (e.g. baobab leaves).

The introduction of new vegetables may lead to unexpected reactions. Raw became very popular as snacks in Northern Nigeria. Soya beans were not popular because they required much cooking, a disadvantage where firewood is scarce. presented in this book will be most useful to those concerned with introducing research, and to students and vegetable growers. The author, well-known publications on tropical agriculture, has produced a work which will be considered a standard reference for many years to come.
