Working Through Environmental Conflict: The Collaborative I

Publisher

Praeger (an imprint of Greenwood Publishing)

Abstract

Examines the uses of collaboration in environmental and natu
decision making and conflict management.

Environmental and natural resource policy decision making is
citizens and management agency personnel are seeking ways
participate meaningfully in the decision making process as par
conflicts. Doing things differently has come to mean doing thi

Daniels and Walker examine collaboration in environmental decision making and conflict management. They address collaborative learning, that has been designed to address conflict management needs in complex and controversial policy areas. This approach illustrates, collaborative learning differs in some significant ways from traditional approaches for dealing with policy decision making, public participation, and resource management. First, it is a hybrid of systems thinking and alternative concepts. Second, it is grounded explicitly in experiential, team-based, and adult learning theories. It is a theory-based framework through which progress in the management of controversial environmental issues can be discussed. This book discusses both the theory and technique of collaborative learning and how it has been applied. This is a professional and teaching tool for researchers involved with environmental issues as well as dispute resolution.
