 Abstract & Citation

Abstract

This poster session is designed to demonstrate a variety of ways that preservice teacher candidates are taught to use technology as a tool to enhance the study of children's and adolescent literature. The presenters will share projects that were created by preservice candidates in the college classroom and projects accompanying adolescent literature that were implemented with seventh and eighth grade language arts students. Session attendees will be able to gather a variety of ideas for using technology to build critical background for literature study, for organizing information, and for constructing responses to literature.
