**Author(s):** Hernez-Broome, Gina; Hughes, Richard J.

### Abstract:

This article reviews notable trends in the leadership development field. In the past two decades, such trends include proliferation of new leadership development methods and a growing recognition of the importance of a leader's resonance with others. A growing recognition that leadership development involves more than just developing individuals has now led to a greater focus on the context in which leadership is developed, thoughtful consideration about leadership competencies, and work/life balance issues. Future trends include exciting potential advances in global technology, return on investment (ROI), and new ways of thinking about the nature of leadership and leadership development.
