## Writing for interactive radio instruction.

**Author:** de Fossard E

**Source:** Washington, D.C., Education Development Center, 1994. 187 p.

**Abstract:** This book, "Writing for Interactive Radio Instruction," serves as a guide in writing interactive scripts by demonstrating a variety of approaches that work successfully for interactive radio instruction (IRI). The first chapter presents an overview on IRI and the methods in planning the IRI series. The second chapter discusses the responsibilities, maintenance and tips in script writing. The third chapter focuses on the lessons of IRI, particularly in the segmentation and distribution of learning, achievement of segment balance, linking of segments, modeling, reinforcement and cueing, and questioning techniques. The fourth chapter highlights the role of classroom teachers in IRI. The fifth chapter demonstrates the formats frequently used for IRI programming. The sixth chapter, on the other hand, describes a script, while the next chapter presents the special needs of radio programs. The eighth chapter provides several guidelines to good writing. Chapter 9 presents the steps in evaluation, which include formative evaluation, formative evaluation of program popularity, commonly raised questions, formative testing and content, and summative evaluation. Chapter 10 contains the glossary of format terminology, and the last chapter presents several script samples.
