Believe: A Motion Graphic Animation Brings Positive Power to Life

[Yu-Hsin Chang](#)

Abstract

Life is an adventure, and growing up is not always enjoyable. When Life is filled mainly with struggles, sometimes people lose their confidence. They lack faith in themselves. Believe is a short motion graphic that comes directly from my own personal experience. This animation expresses my views on progress through life.

The motion graphics animation has had a significant impact on audiences. The story encourages people to build up their faith and self-confidence, because Life is full of opportunity.

The project was made by using motion graphics design concepts and experimenting with current computer graphics integration technologies. The final delivery is an one minute and 30 seconds world of imagination motion graphic.

Sharing my personal experiences that may benefit others, as a motion graphic designer, I hope to convert my thoughts into creations meaningful to the universe.
